SKILLS

Languages: Java, JavaScript, TypeScript, Python, SQL, C++

Backend: Spring Boot, Spring Data JPA, Hibernate, JDBC, REST APIs, Firebase (BaaS)

Frontend: React.js, Redux Toolkit, Tailwind CSS, HTML

Databases: MySQL, PostgreSQL, Firestore

Tools & Platforms: Git, GitHub, Maven, Postman, CI/CD, Vercel

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, State Management, Authentication & Authorization, Real-time Systems

PROJECTS

CodeOrbit — AI-Powered GitHub Code Assistant

- Built an AI-powered developer assistant that connects to **GitHub repositories**, indexes source code, and enables **natural-language codebase Q&A using Retrieval-Augmented Generation (RAG)**.
- Implemented **GitHub OAuth2 authentication** and secure session-based repository access using Spring Security.
- Developed a React dashboard for **repository synchronization, search/filtering, indexing-status tracking, and error handling**.
- Built a code-indexing pipeline using **vector embeddings + PostgreSQL/pgvector** for semantic code retrieval and contextual AI responses.
- Containerized the database infrastructure with **Docker Compose** and exposed backend functionality through REST APIs.

TaskFlow - A scalable multi-tenant SaaS for real-time organizational workflow and secure team collaboration. [Link](#) Jun '26 — Aug '26

- Multi-Tenant Data Silos :** Engineered secure organization isolation using Firestore RBAC and a "Secondary Auth" bridge for seamless employee account provisioning.
- Synchronous Messaging Logic :** Developed a dual-layer chat architecture using Firestore Snapshots for global DMs and task-nested, contextual sub-collections.
- Integrated Multimedia :** Implemented Agora SDK for low-latency video conferencing and a broadcast engine to push scheduled meeting payloads to team subsets.
- SMTP Lifecycle Automation:** Integrated EmailJS to automate secure SMTP-based verification, temporary credential handling, and password recovery workflows.
- Dynamic Access Tiers:** Built programmatic subscription logic that enforces organization-wide user limits and feature availability based on metadata-driven plans.

Xcrypto - A crypto price tracker and making them very easy to understand [Link](#) May '26 — Jun '26

- RESTful Data Orchestration :** Integrated CoinGecko API to architect a real-time dashboard and multi-currency conversion engine for 10,000+ digital assets.
- AI & Content Logic :** Developed a contextual AI financial assistant and a modular blog system to deliver automated asset insights and deep-dive research.
- User State Persistence :** Engineered secure authentication to manage personalized "Watch History" and metadata-driven premium access tiers.

EDUCATION

B.tech in artificial intelligence (ABESIT), Dr. A.P.J. Abdul Kalam Technical University (GPA: 8/10 till II year) Sep '24 — Present

Intermediate in Science, SDSVMIC (GPA: 8.5/10) Apr '22 — Apr '23

High School in Science, SDSVMIC (GPA: 9/10) Apr '20 — Mar '21
